

Backpack Plus 32470

Dimensions: 23"L x 14"W x 12"D

Designed from our heavy duty nylon fabric the Backpack Plus is the midsize workhorse of our backpack line. With multiple purposes in mind, the Backpack Plus is made for not only easy organization but quick deployment of all your ALS and trauma supplies.

Gain quick access to your AED that is secured in the front bottom pouch with quick release tie downs. In the back there is a flat pouch to store your electrodes, pads and other prep tools. The other exterior pocket can hold cervical collars and store straps.

Slide the heavy duty double zippers to open the main compartment to find several customizable organization options. On the inner lid you will find three removable color coded pouches with clear windows to hold supplies. Behind this lid you will find two zippered inner pockets for flat supplies. The removable dividing panel offers a combination of both flat zippered and clear gusseted pockets for intubation supplies.

The O2 compartment is equipped with quick-release tie-downs to secure a "D" or a Jumbo "D" oxygen tank. Two mid-size mesh pockets are to the left of the tank straps to hold portable suction and BVM supplies. To prevent wear the corners have been reinforced with high density plastic. Carry this bag multiple ways including the ergonomically designed backpack straps and the side or top rubber molded handles.
