

▲ Tapered Pockets - Reduces Wear & Tear

Ultra Breathsaver 34018

Deluxe ergonomic dual adjustable shoulder strap included

Dimensions: 29"L x 13"W x 12"H ~ 4524 cu in

Weight: 8.6lbs

The Ultra Breathsaver is one of the best trauma bag systems in the market. This bag was designed by EMS professionals for other EMS professionals. Not only designed efficient storage and organization, the Ultra Breathsaver allows you to quickly deploy with oxygen/resuscitation, airway management, and trauma supplies with ease and security. Fold down the two front pockets to find a flat zipped compartment with two rows of elastic tool holders.

On the opposite side there are two large open pouches for bulky trauma supplies with a row of multiple sized elastics. The full length rear pocket can carry cervical collars and other immobilization accessories. The left end pocket fully opens giving you easy access to the oxygen tank secured in the main compartment while giving you additional storage for bulk supplies.

These pockets are tapered to reduce the wear and tear that you put on your bag everyday. Inside the main compartment you will find multiple sizes of elastic tool holders and a removable, padded organizational shelf on top of the padded oxygen tank compartment.

Lift the oxygen tank protective lid to find a secure compartment to fit your D size oxygen tank. Look up at the top lid to find a full length mesh, dura-view pouched lined with a line of eight elastic tool holders of multiple sizes. The bottom of the Ultra Breathsaver is reinforced with UP fabric for ease of cleaning. The plastic runners on the bottom of the case add extra durability.

The nylon handles wrap around the entire bag for improved weight distribution and have a built in padded wrap to connect both handles for added comfort. In addition our exclusive ergonomic padded shoulder strap gives maximum comfort while carrying the case. Manufactured with top of the line materials and superior workmanship, the Ultra Breathsaver will be able to stand up to wear and tear while maintaining a modern, professional appearance.
